Calculus I
MATH 130S-COX
June 17-July 19, 2013

Important Information:

Instructor: Chris Cox
Office: Cupples I 203
Time: MTWThF 1:00-2:45
Email: ccox@math.wustl.edu

Course Website:
http://math.wustl.edu/~ccox/130s.html

Text: University Calculus, (Early Transcendentals/Single Variable)

Important Dates:
Wednesday, July 3
Thursday, July 4
Friday, July 19
Midterm
No Class
Final Exam

How your grade is determined:
Midterm 30%
Final Exam 30%
Quiz Average 10%
Webwork 30%

More detailed information:
Exams: All exams will be closed book, closed notes, with the exception that you may use a handwritten 3X5 card. Graphing calculators are not allowed on the exams. The final exam will be comprehensive but will emphasize material covered after the midterm. If you are forced to miss an exam contact the instructor as soon as possible.

Quizzes: There will be a short (5-10 minute) quiz on recent material almost every class. There will be no make-ups if you are not in class when the quiz is given.
**Homework and WebWork:** For each section there is a set of recommended exercises from the text which will not be collected. Each week there is a WebWork assignment due Monday at 11:59 pm. You may redo most of the WebWork problems an unlimited number of times before the deadline. See the course website for more details on getting started with WebWork.

**Resources:** As the course moves along very quickly it is essential that you stay on top of your work. I encourage you to discuss problems with your classmates, but you should work out and write up the WebWork solutions on your own. Two important resources:
- Calc Help Desk: Cornerstone Tech Lab.
- FSAP Math 130S tutor.
